

COVID – 19 UPDATE

We are now OPEN, providing all dental treatment, including Full Hygiene Services with enhanced PPE.

All patients will be verbally screened by phone before their appointment and in writing upon arriving at our office.

All staff will be screened at the start of each day. Use of enhanced PPE will include N95/KN95 masks, isolation gowns, and face shields.

We will ask patients to wait in their cars instead and we will call the patient when the operator is ready for treatment.

We will have patients hand sanitized when they come into the office and after their appointments.

We ask accompanying individuals to wait in their respective vehicles (except for legal guardians or caregivers, who will also be screened).

We encourage patients to wear their masks in and out of the dental office.

We have installed clear screens at the reception counter as an extra layer of protection.

We may look a little different donned in all our PPE, but, as always, we continue to provide exceptional care to all existing patients and new patients.

Your kind referrals are deeply appreciated.
